

How Would You Like To Play a Key Role in Bringing 211 To Central Alberta?

We are currently looking to recruit volunteer Data Checkers. The data checkers will play a key role in checking the information received from local non-for-profit organizations before it goes to our trained 211 Data Entry Administrator. Training will be provided so that all volunteers are comfortable in the role they are being asked to perform. Because 211 holds much more detailed records of each organization than a 411 directory service database. This would suit people that are detail oriented and concise. Knowledge of the local health and social services organizations would be useful but not essential.

If you are interesting in finding out more or volunteering for this exciting and important role please contact Val Yarbrough at the United Way office 403 343 3900 or email info@caunitedway.ca.
